

Fig. 1 Responses to event nouns and verbs. (A) Percentages of signal change in the left middle temporal gyrus (LMTG). (B) Results of the whole-brain analyses for event nouns > object nouns (green/light) and

verbs > object nouns (red/dark). The results are thresholded at $p < .05$ (corrected for multiple comparisons) and displayed on a normalized template brain. For a complete list of whole-brain activity, see Table 2
