Figure 3. Competition effect in left opercularis. (*a*) Left opercularis anatomical ROI displayed on a template. (*b*) Average time series data for each of inconsistent, consistent, and control. Percent signal change from zero is on the *y*-axis, image number (TR) is on the *x*-axis. (*c*) Correlation between inconsistent difference in the opercularis and the behavioral competition effect across participants. The inconsistent − consistent beta value is on the *y*-axis. Inconsis percent errors is on the *x*-axis. Each point represents a single subject.

f the 3 conditions:
t versus consistent
stent — consistent
